

## Hardware Kit

The hardware kit consists of at least two of the following:

1. (2) Z-bar hangers (taped to the back of the board)

Screws and hardware to attach hangers to the wall should be appropriate for the type of wall construction and are to be supplied by the installer.

## Installation Instructions

1. Measure approximately 3 3/4" down from desired top edge of board.
2. Strike a level line at this location long enough to mount all boards to be hung at this level. Mount the bottom of your first Z-bar hanger on the line.
3. Hang board on top hanger and mark the bottom edge of board. Remove board and measure up 1 3/4" from bottom of board line. Strike a level line and mount the bottom of your second Z-bar hanger on that line.
