

Pitch Mobile

by *Claridge*

The inspiration for the Pitch Mobile grew from the aesthetic of free-standing pivot mirrors. This lighter scale, residential form lends itself well to the interiors we see and are designing for. Having the ability to specify this mobile in a variety of finish options will allow this family of mobiles to function in a wide range of environments and aesthetics.

Pitch Mobile

PRODUCT DESIGN NOTES

- Slightly pitched double-sided mobile surface creates an elegant obelisk side profile.
- A slight angle of the board's writing surface makes the mobile board more approachable and provides a little more comfort to the user.
- A storage cubby and stylish designer leather pull strap are integrated along both sides of the mobile.
- Comes with two (2) locking and two (2) non-locking Hubless Casters. The hollow interior not only projects a unique aesthetic appeal but even enhances the overall stability.
