## 1. DesignTex

DesignTex introduced a new textile collection, Celliant. This textile contains cutting-edge fibers that utilize technology to improve circulation. Minerals blended into textile fibers naturally reflect infrared energy back into the body to improve blood circulation, which increases tissue oxygen levels to help deliver nutrients throughout the body. As workforces transition to sitting for longer periods of time, this fiber may help stave off the negative effects of sitting.

## 2. Allsteel

New products from Allsteel focused on the user's ability to decide where, when and how to work. Freedom resides in holding a team touchdown with Hi/Lo meeting tables surrounded by Solo lounge pieces and Cloud movable partitions to establish privacy. Touches of residential softness and flexibility are incorporated into Allsteel's 100-year history of crafting innovative workplace solutions.

### 3. Skyline Design – Linework Glass Collection

Skyline Design won the Editor's Choice Award at NeoCon 2018 this year for its new Linework Glass Collection. This collection can be used on the interior and exterior of buildings. Skyline Design collaborated with the Architecture firm Gensler to create a seamless collection emphasizing the purity of the line. The simplicity of this new collection will enhance many spaces from health care care team stations, to hospitality design.

### 4. Claridge

One of the best ways to improve collaboration in a classroom, office or conference center is using a markerboard system. Claridge introduced a new product at NeoCon 2018; MIX Material Mobiles & Wall Mounted Markerboards. This new collection prides itself in customizability by including a variety of finishes and details for users to make each specification unique to them. MIX Material Mobiles & Wall Mounted Markerboards was also designed as a furniture solution. Claridge provide the option to have Markerboard Surfaces mounted on mobile walls and create space dividers, biophilic walls and acoustical solutions making this new system very flexible.

### 5. Mannington Moire Carpet

Mannington paired with artist Gabriel Dawe to create this one-of-a-kind carpet collection. Dawe used delicate thread to form works of art in vibrant colors. He created a unique art installation that was featured over the escalator from level 1 to level 2 at Neocon. Dawe collaborated with Mannington to create a carpet collection that plays up the idea of the light reflecting on multiple strands of colors and patterns that link together.
