Number	Size (HxW)	Weight
SD-SG-7236	72" x 36"	90 lbs.
SD-SG-7248	72" x 48"	107 lbs.

SURFACE COMPARISON

Claridge Glass	vs	Plexiglass/Acrylic
Scratch-resistant		Scratches easily
Does not burn		Burning it releases dangerous fumes
Safety tempered glass		It crazes under high stress, leaving a network of lines and shallow cracks on the surface
Cleans with bleach, hospital-grade, or standard cleaners		Not chemical resistant; even nail polish remover can cause cracks and crazing
Does not change appearance after cleaners are used		Ammonia and ammonia-based cleaners cause it to become cloudy
Can be used for the life of the building		Temporary solution
